

Kaiser Matin
DARPA-MTO

Dr. Kaiser Matin is a mechanical engineer with over 20 years of expertise in research, advanced technology development and management. He is an expert in thermal design and heat transfer technologies. Currently he is a technical advisor (SETA) at DARPA/MTO providing support for DoD warfighter enhancements. Previously, Kaiser was a Staff Engineer at United Technologies and was responsible for the thermal design of airborne electronic boxes, motors and generators. Kaiser received his MS and a Ph.D. degrees in Mechanical Engineering from Texas Tech.
